APPLICANT : MOTOMISE NAMAKON:KK;

INVENTOR : TAKAMURA YOSHIKI;

INT.CL. : B28C 5/42

TITLE : RECEIVING VESSEL OF FILTHY  
WATER FOR CLEANING CHUTE OF  
TRUCK MIXER-CAR

BEST AVAILABLE COPY

ABSTRACT : PURPOSE: To enable filthy water to be collected and received easily and further to be removed simply by a method in which the receiving vessel of filthy water after washing a chute, is fitted to the rearmost of a truck mixer-car, and the filthy water after washing the chute is stored in the vessel, and then said water is dumped in a prescribed place by one touch.

CONSTITUTION: A strut 1 is connected to a shaft so as to be folded and received in the positions of 1<sup>1</sup>~1<sup>3</sup> so that said strut does not disturb in the running of a truck mixer-car. An expansible and shrinkable plate 2 is caused to be capable of expanding and contracting correspondingly to the length of the chute of the truck mixer-car. The receiving vessel 3 of filthy water is a vessel capable of collecting and receiving the water after washing of concrete. A fitting plate 4 is closely stuck to the truck mixer-car and has the screw stop 4' capable of attaching and detaching. One touch valve 5 for discharging the filthy water is provided.
